Pickups		
Bridge Pickup	“Off-Leash” Dog-Eared P9 - Output 8.0k - Alnico 5 Magnet - Polyurethane 42 gauge coated wire - Wax potted	These P90 's are the best we've ever heard and more and more customers and artists are agreeing with us every day. The bridge was calibrated to stand tall on its own on single pickup guitars; powerful and punchy with spanky highs and massive character in it's growl. This guitar will take you through the entire Tom P catalogue with class, isn't afraid to hang with Neil Y, cleans up clear and rich, and will surprise the hell out of you if you start stacking gain. Plug-in to wear your best mile-wide grin.
Neck Pickup	None	The neck position pickup was voiced first. Clear and harmonically rich with a sweet 'bell tone'. This is the same Bridge pickup as found in the P.Dawg but with a different soap-bar casing.
